

<b>Course unit title:</b>	Internship Project
<b>Course unit code:</b>	CSW418
<b>Type of course unit:</b> (Compulsory/optional)	Optional
<b>Level of course unit:</b> (First, second or third cycle)	Bachelor (1 <sup>st</sup> Cycle)
<b>Year of study:</b>	2 or 3 or 4
<b>Semester when the unit is delivered:</b>	Any from 3 to 8
<b>Number of ECTS credits allocated:</b>	6
<b>Name of lecturer(s):</b>	Not applicable
<b>Learning Outcomes of the course unit:</b>	
<p>Upon successful completion of this course students should be able to:</p> <ul style="list-style-type: none"> <li>• Recognize and explain the process and considerations of applying scientific knowledge within an industrial ICT environment</li> <li>• Apply the scientific knowledge gained in information systems courses to an industrial ICT case study</li> <li>• Gain experience in developing an industrial project report</li> </ul>	
<b>Mode of delivery:</b>	Work Placement
<b>Prerequisites and co-requisites:</b>	GPA 3.0 or higher
<b>Recommended optional program components:</b>	None
<b>Course contents:</b>	
<b>Objective:</b>	
<p>The aim of the suggested scheme is to provide students with the opportunity to gain practical experience within an industrial environment on the implementation of a real-life information systems project.</p>	
<b>Description:</b>	
<p>An internship project in the area of information systems is completed by the student within the premises of a private or a public sector company, subject to faculty approval. Upon the completion of the internship project the student submits a written report describing the tasks accomplished and the satisfaction of the project's objectives. The internship project</p>	

work is co-supervised by a member of the Computer Science & Engineering Department (internal “mentor”) and an employee from the company within which the internship project will take place (external “mentor”).
