| <p>Objective: This course is aimed at providing freshman students with the language knowledge essential for comprehending the specific language and vocabulary within the field of Health Sciences . The course covers all four language skills with particular emphasis on the development of the four language skills .</p> | |

Description:

Following ENH 070, this ESP language course further aims to help students to acquire and practise functions and vocabulary essential to practitioners in Health Sciences. The necessary skills and knowledge required to comprehend and discuss scientific articles and sources related to the field are developed throughout. The course also focuses on the language and interpersonal communication skills needed to apply in the context of the Health Sciences. Practice is also offered in the writing of memos, letters and reports that such professionals are required to produce.
